[Mixing Software For Mac](#)

 - IceHUD This is designed to keep your focus in the center of the screen where your character is.. - Viper Notify- (Hunter) Displays a notification when the hunter is using Aspect of the Viper at full mana.. Well I found the solution to that HERE!!- X-Perl UnitFrames Replaces your Unitframes, so you can modify them, also has an indicator in it for your agro, great for tanks.. - Bartender4 This is is a full ActionBar replacement mod It provides you with all the features needed to fully customization most aspects of your action and related bars.. If you want to change position of unitframes/pet actionbar/buff tracker and you don't know how just reply in this thread and I'll answer your question. [Whatsapp For Pc Mac Download](#)

This is the list i came up with, all are pretty usefullInterface addons- Cartographer This was the best map addon I know, but it's not getting updated anymore.. - Warrior Vigilance Tracker- (Warrior) Tracks, cast with one click and shows time left of Vigilance.. - KgPanels To freely design your WoW UI with selfmade graphics etc - Clinque Lets you assign mousebuttons and combinations freely to any spell.. - SexyMap Gives your minimap a sexy look - SpartanUI SpartanUI is designed to free your screen by moving a majority of the interface elements to the bottom.. So I came to you Am I missing something? Does anyone have any suggestions as to where I can find a working GS addon file to download? Thank you in advance for your. 773a7aa168
